

MOHAMED HISHAM GAD

El Rehab, New Cairo • +201001771740 • mohamed.h.gad4@gmail.com • Open to relocate

www.linkedin.com/in/mohamed-gad-624521280

OBJECTIVE

Aspiring Data Engineer, Data Analyst, and AI Engineer driven by a passion for building scalable data systems, uncovering meaningful insights, and developing AI solutions that solve real-world problems. Fluent in English and French.

WORK EXPERIENCE

Data Science Intern, Tanmeyah

Feb 2026 - Jun 2026

- Assist in real business cases by building SQL queries
- Build loan officer's reports using Microsoft Report Builder
- Build a dashboard for loan officer's using Power BI

Quality Control Intern, Tanmeyah

Sep 2025 - Nov 2025

- Studied software testing theory using the official ISTQB textbook.
- Practiced manual testing through hands-on projects, including GURU99.
- Assisted in testing Tanmeyah's new project.

Data Engineering Analyst Intern, Ejada

Jul 2025 - Aug 2025

- Designed and implemented a data pipeline from OLTP to OLAP using SSIS.
- Developed and integrated ETL workflows to populate the data warehouse.
- Created an interactive Power BI dashboard to analyze and visualize warehouse data

Junior TA, Programming 2, (Java), GIU

Feb 2025 - Jun 2025

Junior TA, Programming 3, (C++), GIU

Oct 2024 - Jan 2025

Junior TA, Programming 1, (Python), GIU

Oct 2023 - Jan 2024

EDUCATION

German International University for Applied Sciences, Cairo

Oct 2022 - Jun 2026

Computer Science and Informatics, Major: Data Science, Minor: Software Engineering
Thesis on "**AI Platforms for Healthcare Applications**":

- Developed a medical Arabic-English code-switched dataset (MedCS-TriageE) for triage classification using real-world medical audio data
- Built a full NLP pipeline including audio denoising, Whisper-based speech recognition, sentence correction, and multilingual classification using XLM-R and DeBERTa models
- Evaluated dataset quality and model performance using code-switching metrics and cross-validation techniques for clinical NLP applications

Lycée Concordia, New Cairo

2008 - 2022

PROJECTS

Customer Churn Prediction

2024

- Built and compared Logistic Regression, Decision Tree, and Random Forest classification models to predict customer churn using Python, Pandas, and Scikit-learn.
- Applied data preprocessing, feature engineering, and hyperparameter optimization to improve predictive accuracy and maximize ROC-AUC and F1-score.

AI Text & Image Generator Web App

2026

- Developed REST API endpoints using Express.js and created an interactive frontend with React.js and Tailwind CSS
- Implemented dynamic prompt handling, real-time AI responses, image rendering, and local image storage functionality

GovConnect App

2025

- Implemented interactive social features including voting, likes, comments, anonymous commenting, and bilingual Arabic-English translation support
- Added content moderation features such as inappropriate language filtering, admin-controlled post/comment management, advertisement verification workflows, and dark/light mode UI support.

SKILLS

Programming Languages:

Java, Python, C++, SQL, JavaScript, TypeScript, Dart

Frameworks & Technologies:

React.js, Next.js, NestJS, Express.js, Flutter, Firebase, Node.js

Databases & Data Tools:

MongoDB, Oracle SQL Developer, DBeaver, SSMS, SSIS

Data Engineering & Analytics:

ETL Pipelines, Data Warehousing, Power BI, Report Builder, Data Visualization

Machine Learning & Deep Learning:

Scikit-learn, TensorFlow, Keras, Regression, Classification, NLP, Computer Vision, ANN, Random Forest

AI & APIs:

Hugging Face APIs, AI Image Generation, AI Integration, Whisper ASR, Arabic-English Code-Switching NLP, Dataset Construction & Evaluation, Text Classification

Tools & Version Control:

Git, GitHub, VS Code, Postman, Jupyter Notebook, Google Colab

LANGUAGES

- Arabic: Native language
- French: Fluent
- English: Fluent
- German: Beginner
